REMARKS

The following facts are provided in support of the corresponding Petition for Revival of an Application for Patent Abandoned Unintentionally Under 37 CFR 1.137(b). In the present application:

1) An original Declaration and Power of Attorney was filed with the Office on March 19, 2004, appointing attorneys and/or agents associated with Customer Number 27441 to prosecute the application (see “Declaration and Power of Attorney”, Exhibit A). Customer Number 27441 was associated with the law firm of Watts Hoffman Co., L.P.A. (hereinafter “Watts Hoffman”). The original Declaration and Power of Attorney also indicated the correspondence address as the address of Watts Hoffman in Cleveland, Ohio.

2) A new power of attorney to prosecute the application was filed with the Office on March 14, 2005, revoking all previous powers of attorney given in the application (see “Power of Attorney to Prosecute Applications Before the USPTO”, Exhibit B). The new power of attorney also appointed practitioners associated with Customer Number 22971 to prosecute the application, and changed the correspondence address to the address associated with Customer Number 22971. Customer Number 22971 was and is associated with Microsoft Corporation in Redmond, Washington.

3) The Office incorrectly mailed a first Office Action on October 2, 2006, to Watts Hoffman in Cleveland, Ohio (see Exhibit C). No reply was made to the Office Action, resulting in abandonment of the application.

4) The Office incorrectly mailed a Notice of Abandonment on April 17, 2007, to Watts Hoffman in Cleveland, Ohio (see Exhibit D).

Type of Response: Amendment
Application Number: 10/805,083
Attorney Docket Number: 306979.01
Filing Date: March 19, 2004

Applicants respectfully request that the Office update its records for the present application to incorporate the information contained in the new power of attorney (as shown in Exhibit B) filed with the Office on March 14, 2005. Specifically, the new power of attorney revokes all previous powers of attorney given in the present application and appoints practitioners associated with Customer Number 22971. Additionally, the new power of attorney changes the correspondence address to the address associated with Customer Number 22971.

Respectfully submitted,
Microsoft Corporation

Detailed Action

1. This action is responsive to communications: Application, filed on 03/19/04.

Allowable Subject Matter

2. Claims 2-12, 14-19, 22-31 and 33-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach and/or suggest "a constraint parser that interprets and converts the currency constraint into a form usable by the query optimizer . . . constructs a query plan for executing the query . . . subplan selection operators that check a currency of a local replica against a query's currency constraint . . . wherein the query processing engine executes the query plan . . . a result that satisfies the query's currency constraints."

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 13, 20-21, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Carey et al., US# 20010049685.

As per claims 1, 13, 20-21, and 32, Carey et al. teaches "a constraint parser that interprets and converts the currency constraint into a form usable by the query optimizer; a query plan generator that constructs a query plan for executing the query, wherein the plan includes one or more subplan selection operators that check a currency of a local replica against the query's currency constraint" (see abstract and paragraph [0096] and [0097]) "selects the subplan using the local replica only when the constraint is met; and wherein the query processing engine executes the query plan, including the subplan selection operators, thereby producing a result that satisfies the query's currency constraints" (see paragraph [0177] and [0190]).
